EYC Bar Stool Seat Replacements

Replacement seat: Lancaster Table & Seating Deluxe 19" Wide Black Barstool Bucket Seat, Item#164BUKCUSHBK @ \$33.99 price, minimum order is 2 seats at total cost \$86.49 to include shipping and tax. (\$43.25 per replacement seat)

ordered from: <https://www.webstaurantstore.com/>

There are twelve (12) bar stools in EYC Club.

The replacement seats come with a standard seat bolt pattern 5" square and they come with allen large head bolts with allen wrench provided.

The bar stool platform has a large industrial swivel with a non-standard bolt pattern. Accordingly, you must manufacture an adapter to install the replacement seats to our bar stool stands. This adapter is best made with an aluminum sheet metal like use on traffic signs. An old traffic sign was used to make 6 adapters.

First, cut an 8 ½ inch square of sheet aluminum. The front of the adapter will be attached to the raised portion of the bar stand. (Raised section of existing bar stool stand will be to front of new seats – thus providing slight backward tilt) Hole separation distance for front is 6 1/2 inch on center. The hole separation for the rear portion of the adapter is 7 ¼ inches. Drill these holes with a ¼ drill. Carriage bolts (¼ X ¾) must fit snugly in the hole and driven down over square below head to secure bolts to adapter. Slide bolt threads through outside holes and hammer square section into aluminum plate. These bolts will be used to attach the adapter to the non-standard bar stool stands. Look at already adapted seats to check construction.

Adapter parts list:

- 1 – 8 ½ inch square piece of aluminum sheet plate
- 4 - Carriage Bolts ¼ X ¾
- 4 - ¼ 20 Hex nuts course thread
- 4 - ½ split lock washers

Holes (5" separation) for replacement seat allen head screws
