While nothing could be voted upon those present did discuss a few items:

-) We need to determine how to store diesel fuel for the new compressors.
-) Many thanks to Ben's Lake for arranging the DLA compressors transfer to EYC. Dive members are working on hopefully getting one, possibly two of the "new" compressors to work. Note that these "new" compressors output is 6 CFM versus the 20 CFM the last two had.
-) The current compressor needs to be prepared for movement NLT 10 June at 0900.
-) Base access can be obtained but it is a complicated process. Barry will find out if we can get approval for a 1-year pass.
-) We need better definition on the cost and contract details to repair the EYC dock, especially the electricity.

ADJOURNMENT: Those present left at about 1730 hours.
